Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 February 2005.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on February 23, 2005 has been entered.

Claims 53, 55-58, and 60-63 are pending.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 53, 55-58, and 60-63 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 5,648,059 ('059), US 5,843,894 ('894) and Hammond et al. (Br. J. Cancer, 1993;67:1437-1439) from IDS filed April 21, 2003).

'059 teaches L-lysine, arginine and ornithine as useful as inhibiting the retention and reabsorption of therapeutic immunoconjugate such as antibodies and monoclonal antibodies (See claims 1, 2, 3, and 5). '059 teaches protein uptake by the kidney as

Art Unit: 1617

decreased when a dosage of 10mg lysine is administered to a rat animal (See col. 10-11, Examples I-III).

'894 teaches D-Lysine as useful in a method of reducing the uptake of antibody fragments (See the abstract). '894 teaches the effective dosage of lysine and polysine solution effective in reducing uptake of antibody fragments as 2-35g/L and 10-25g/L respectively (See col. 6, lines 15-28).

Hammond teaches amino acids 4.93g/L of lysine and 17.6 g /L of arginine as useful in blocking renal tubular uptake of somatostatin (See page 1437, col.2, Materials and Methods section).

The references do not expressly teach the herein claimed dosage of lysine and arginine.

It would have been obvious to one of ordinary skill in the art at the time the invention made to adjust amount of the herein claimed active to the herein claimed dosage.

One of ordinary skill in the art would have been motivated to adjust amount of lysine, polylysine, and arginine to the herein claimed dosage since the optimization of the result parameters as within the purview of the skilled artisan, absent evidence to the contrary.
